

REVIT® 2022 LEVEL I PROJECT MANAGERS FOR ARCHITECTURE

► Length

1 Day

► Cost

\$400 per person
(Dedicated group rates available)

► Level

Beginner

► Prerequisites

A strong architectural background and experience with managing projects, as well as general computer and Windows experience

► Who Can Benefit From This Class

Architectural and interiors project managers who want to understand how Revit® is affecting the design and documentation process

► Hours

9:00am – 4:30pm EST
with an hour lunch break

► Additional Information

This class comes with a 100% Satisfaction Guarantee, provides AIA/CES Continuing Education Credits (CEU's), and each student receives a certificate of completion. Please see our website for more information.

DESCRIPTION

This one-day class is designed for individuals, such as architectural/interiors project managers or supervisors, who need to view and manage projects in Revit®. Attendees will receive an overview of navigating in the Revit environment, as well as basic modeling and drawing techniques. This class will provide the skills necessary to redline/mark up Revit models as well as address common Revit management issues such as staffing, workflow, and model-driven decision making.
