

CUSTOM PRESENTATIONS

TECHNOLOGY CHANGES QUICKLY AND YOUR TEAM NEEDS TO STAY UP TO DATE

With the rapid progression of hardware and software in the design industry, firms spend time and money to keep their employees up on what is new - not to mention the time spent identifying what's important in the first place. Moving past the white noise is critical, as you can't afford to waste your team's time on technology and practices that aren't going anywhere.

WE CAN IDENTIFY WHAT'S IMPORTANT

The technology consultants at CADD Microsystems work hard to stay up to date on the latest design hardware and software changes. Our experience of working in the field, combined with our hands on assistance for firms from the smallest to the largest lets us know what's critical and useful and what will be a flash in the pan.

WE CAN HELP SHARPEN YOUR SAWS

Maybe your team needs a refresher on a tool they haven't used in a while or wants to learn about a new way to use that tool. Our training experts can focus a single one-hour session for your group, or spend 8 hours giving everyone a thorough recap.

CUSTOMIZED PRESENTATIONS FOR YOU

Whatever you need, CADD will work with you and tailor a class or series of classes built with your team and your needs in mind.

WHAT CAN WE COVER?

We can present on any of your current design software or technology-or tools you haven't yet used-such as AutoCAD, Revit, Civil 3D, Infracore, BIM360, Virtual Reality, COBie, BIM, etc. We can structure the content in a variety of ways:

- **Product features and overviews**
- **Roundtable discussions**
- **Online/on-demand lessons through CADD Community**
- **Lunchtime presentations**
- **Topic lessons**

Let our training experts develop customized presentations for your team.
