---

▶ **Additional Information**  
This class comes with a 100% Satisfaction Guarantee, provides AIA/CES Continuing Education Credits (CEU's), and each student receives a certificate of completion. Please see our website for more information.

## DESCRIPTION

This class is for Revit users who want to understand the workflows around collaborating with your Revit models through a BIM 360 project. Students will learn the different ways to setup a Revit project in BIM 360, as well the features and functionality available in BIM 360 Design that can be leveraged. Attendees need a basic understanding of working with workshared Revit models.
